APPLIANCES

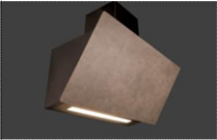

New Launches					
<p>Hafele introduces Kallisto Hoods and Hobs with Shadowstone finish. This series seamlessly blends advanced technology, enhanced functionality, and innovative design. Spaces feel most harmonious when appliances blend seamlessly into their surroundings. Designs that complement the interior, rather than dominate it, create lasting appeal. The Shadowstone finish was not born in a lab or chosen from a colour chart. It is inspired by nature, drawn from light filtering through the Schwarzwald, the German Black Forest. This moment captures how light reveals contours, softens edges, and deepens textures. Shadowstone blends deep greys with subtle mineral undertones. It avoids harsh blacks and flat charcoals, feeling tactile and dimensional. The finish gently shifts character as light moves across its surface. Modern and serene, the Kallisto Series pairs this design with powerful extraction and intuitive control.</p> <p>Hafele's Kallisto Hobs are engineered to prevent spillage from entering internal cavities, ensuring durability and consistent efficiency. Their unique jet design and high-quality brass burners deliver a focused flame that adapts seamlessly to both woks and flat pans, ensuring optimal heat distribution for Indian cooking styles. It offers superior performance, advanced technology, and long-lasting ease of use for modern Indian kitchens.</p>

HOBBS
BUILT-IN GAS HOBBS

Hafele brings to you the next generation of India's first ever Fully Sealed Hobs Range – Altius Plus, which means 'higher' in Latin. Staying true to its name, the hobs from the range offer utmost efficiency, focused power and advanced technology, thereby delivering a higher level of ease and convenience to your daily cooking experience. Experience the ultimate in kitchen flexibility with our cordless hob, designed for effortless relocation and consistent performance, even during power outages. Crafted to provide an enhanced aesthetic and cutting-edge innovation, the range presents to you the trademarked 'Häfele' excellence in quality and functionality for a seamless, long-lasting performance. These hobs are engineered to prevent any spillage from entering their inner cavities making them functionally effective and increasingly durable. The unique jet design of the burners minimizes blockage due to spillage ensuring consistent flame output. Instant ignition ensures hassle free starting and the Flame Failure Safety Device ensures safety from gas leakage due to extinguished flames.

Altius plus series is now also offered in an exquisite "TruMatt" finish and sleek gun metal alloy knobs combining durability with a sophisticated modern aesthetic. The Design not only enhances the look of your kitchen but offers a smooth refined surface for effortless cleaning and maintenance.

ALTIUS FS SERIES

Most of the frequently prepared Indian food like dals and sambhars, gravy laden subzis and even our daily fuel, i.e. chai (the Indian tea) and coffee feature boiling as an important cooking function. Having the recipe attain optimal temperature not only ensures uniform cooking but also boosts flavour. Since boiling is such an integral process in the daily cooking routine of a majority of Indians, there is also a possibility of the prepared food brimming over onto the hob surface. In a built-in hob, such spillage can seep into the internal body and cause blockage of the jets which makes cleaning difficult and affects the overall performance of the hob over a period of time. These hobs are engineered to prevent any spillage from entering their inner cavities, making them functionally effective and increasingly durable. The unique jet design of the burners minimises blockage due to spillage, ensuring consistent flame output. The high quality Brass burners in these hobs provide a focused flame that adapts to the bottom of the cooking vessel, centering at the rounded portion of a wok for maximum heat concentration to allow for seamless blending of the spices and seasoning in the oil. Alternately, the same flame adjusts effortlessly under a flat pan used for making chapatis, offering ideal heat distribution to the base of the pan. This unique feature makes the Altius FS Hobs a fitting range for Indian Cooking. So let's dive into the many facets of this cooking miracle that will support, enhance and inspire your urge to cook and to experiment with different recipes.

Hafele brings to you India's first ever Fully Sealed Hobs Range Altius which means 'higher' in Latin. Staying true to its name, the hobs from the range offer utmost efficiency, focused power and advanced technology, thereby delivering a higher level of ease and convenience to your daily cooking experience. Crafted to provide an enhanced aesthetic and cutting edge innovation, the range presents to you the trademarked 'excellence in quality and functionality' for a seamless, long-lasting performance.
